Dear Tony & Brenda

I am writing to let you know how thrilled I am with my new countertops. My home was built in the 1970's and for several years I have been so tired of the old gold Formica countertops. I didn't want to spend the money and time to replace all my cabinets and I always wanted marble counters but the cost was prohibited.

I heard your commercial on the radio about the countertop resurfacing you offer and that brought me into your store. One of the best decisions I ever made.

Wow, what a difference you made in my old kitchen. I have had so many compliments from everyone stopping by and they don't even know the old Formica is underneath the concrete, they think it's marble and I just smile and let them think so.

Tony and Brenda you are very creative, talented and professional. I highly recommend your company to anyone that asks about my countertops. It only took four days, a reasonable cost and really wasn't that inconvenient for me for such a transformation.

I still am thinking about transforming my old outdated fireplace into something unique, please create some sample boards for me to look at and call when they are ready. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Hank Liners', written in a cursive style.
